
NetSight® Automated Security Manager

- Industry's first solution to integrate the network's switching and routing infrastructure with intrusion defense technology
- Incorporates the best elements of enterprise network management and intrusion defense
- Industry's first product to stop threats and protect network and business operations dynamically

Data Sheet

- **Ensures security using innovative "Location Services"**
  - — Instantly identifies the physical location where an attack was sourced
  - — Allows business to continue while isolating the attacker only; other users are unaffected
- **A key element of Secure Networks**
  - — Provides threat containment using Secure Networks policy architecture
  - — Supports policy/role change based on a user's configuration
- **Incorporates the best attributes of enterprise network management and intrusion defense**
  - — Provides a granular (per-user) policy for stopping unwanted threats and attacks
  - — Provides event log and reporting
  - — Offers granular, port-level control based on the threat and event type
- **Wide platform support**
  - — Use on Windows 2000, 2003 Server, and XP operating systems; Solaris 2.8, 2.9; Linux Red Hat Enterprise ES, WS, SUSE Linux

Bringing Integrated Security to the Network Infrastructure

NetSight Automated Security Manager is the industry's first security application to make the critical connection between infrastructure and security. To do this, NetSight Automated Security Manager uses a revolutionary new technique to integrate the switching and routing infrastructure with Dragon™ Intrusion Defense technology, providing the ability to take action on the port on which an attack is identified.

NetSight Automated Security Manager takes security events from Dragon Intrusion Defense, locates the exact port on the Matrix™ switch where attacks are entering the network, and takes action on the port, stopping the threat. Using a "quarantine role" for the user connected to the port, the Matrix switch can dynamically deny, limit or change the characteristics of the user's access to the network.

NetSight Automated Security Manager is the industry's first product to stop threats and protect network and business operations dynamically.

NetSight Automated Security Manager is part of the NetSight enterprise-class network management system that provides command and control of a Secure Networks infrastructure.

It is the first in a series of new Enterasys security applications designed to support Secure Networks.

Specifications

System Requirements

Operating Systems

Windows XP, Windows 2000, Windows 2003 server

Solaris 2.8 & 2.9
Recommended: Ultra 30/60 Ultra Sparc IIIi processor, 1 GB RAM, 600 MB free disk space

Linux: RedHat Linux Enterprise ES, WS; SUSE Linux

Server Requirements

Server Recommended: P4 3 GHz processor, 1 Gig RAM, 600 MB free disk space

Client Requirements

Client Recommended: P3, 1 GHz processor, 512 RAM, 300 MB free disk space

Ordering Information

NetSight Automated Security Manager (select one of the following)

ASM-SE-LIC
NetSight Automated Security Manager, Small Enterprise

ASM-ME-LIC
NetSight Automated Security Manager, Medium Enterprise

ASM-LE-LIC
NetSight Automated Security Manager, Large Enterprise

ASM-U-LIC
NetSight Automated Security Manager, Unlimited

Required Software (select one of the following)

NetSight Console

NSA-SE-LIC
NetSight Console, Small Enterprise

NSA-ME-LIC
NetSight Console, Medium Enterprise

NSA-LE-LIC
NetSight Console, Large Enterprise

NSA-U-LIC
NetSight Console, Unlimited

Ordering Information (continued)

Optional NetSight Products

NSA-ASM-CD
NetSight Automated Security Manager CD

NSA-CD
NetSight Console CD

NetSight Policy Manager

NSA-PM-CD
NetSight Policy Manager CD

NSA-PM-LIC
NetSight Policy Manager single software license key for use with one copy of the software

NSA-PM-10D
NetSight Policy Manager limited license key (10-device support)

NetSight Inventory Manager

NSA-IM-CD
NetSight Inventory Manager CD

IM-SE-LIC
NetSight Inventory Manager, Small Enterprise

IM-ME-LIC
NetSight Inventory Manager, Medium Enterprise

IM-LE-LIC
NetSight Inventory Manager, Large Enterprise

IM-U-LIC
NetSight Inventory Manager, Unlimited

NetSight Router Services Manager

NSA-RSM-CD
NetSight Router Services Manager CD

NSA-RSM-LIC
NetSight Router Services Manager single software license key for use with one copy of the software

NSA-RSM-10D
NetSight Router Services Manager limited license key (10-device support)

Note: NetSight Tiering Scheme
NetSight tiers break down as follows:

Small Enterprise (SE):≤ 10 devices
Medium Enterprise (ME): ≤ 250 devices
Large Enterprise (LE): ≤ 600 devices
Unlimited Enterprise (U): 600+ devices

("End stations" represent the number of protected workstations, servers, printers, etc. on the network.)

Warranty

As a customer-centric company, Enterasys is committed to providing the best possible workmanship and design in our product set. The NetSight product family includes a ninety (90) day warranty that covers defects in media only.

Service and Support

Enterasys Networks understands that superior service and support is a critical component of *Networks that Know*™. The Enterasys **SupportNet Portfolio**—a suite of innovative and flexible service and support offerings— completes the Enterasys solution. Enterasys SupportNet offers all the post-implementation support services you need—online, onsite or over the phone—to maintain network availability and performance.
